Corcoran Sundquist Post Installation Ceremony Was Memorable Success

Arthur E. Daly, Senior Vice-Commander of Second District Headed Installing Officers—Robert Cate Installed Branford Commander—Local Clergy Speakers Of The Evening.

Corcoran-Sundquist Post No. 83 of the American Legion held its installation of new officers Tuesday evening in the Community House before a large assemblage of Legionnaires and distinguished guests.

The installation ceremony which was conducted by the well trained team from Post 47, New Haven, was carried on throughout with impressive precision and dignified ardor. Arthur E. Daly, senior vice-commander of the Second District, headed the installing officers. He was assisted by Norman W. Scranton, past commander of Post 71, Herman W. Kossack, Post 7, Henry J. Noder, state chairman of the S. A. C., Post 130, Oscar Marchants, past commander of Post 71, Charles I. French and Thomas Haacker both of Post 71.

To those of civilian standing who have never before had the good fortune to witness a military installation of the Legion it was a revelation that may linger in their memories for a long period. And those who have attended many such ceremonies were undivided in their opinions that the affair was as inspiring as any that they had heretofore witnessed.

Robert Cate, one of this state's best known Legionnaires was installed as Commander. His under officers are First Vice-Commander, Robert Richardson; Second Vice-Commander, Lewis W. Jackson; Adjutant, Ray C. Ballou; Finance Officer, William Krenser; Chaplain, Ernest Albertine; Historian, John J. Ahern; Sergeant-at-arms, Alfred Bloomberg; Service Officer, Frank Reynolds; Athletic Officer, Harry Brazeau and Assistant Adjutant, Clarence Bradley.

After the installation ceremony members and guests enjoyed bountiful dishes of delicious hot clam chowder and coffee. Branford's clergy comprising of Rev. Father Cotter, Rev. Charles Cooley, and Rev. Arthur Jones, were the speakers of the evening and their remarks were of the well-balanced serious and humorous vein that went far in making the evening an outstanding and memorable success.

Among the guests were Rev. A. W. Jones, Rev. Charles R. Cooley, Rev. F. Edmund A. Cotter, Hon. Harry G. Cooke, Hon. John Barron, John S. Rogers, Hobart Page, William W. Ham, Fred Houde, Arnold Hart, Charles Ahern, Gordon Cameron, Charles McCarthy, E. Olson, John Carr, G. Barry and Captain Rice, Lieut. Morris, Lieut. Kluge, and Sarg. N. Cirigliano of the Branford Battery.

Retail Group Meets Sept. 22 To Organize

Keen enthusiasm was manifest by the twenty merchants who attended a meeting in the Community House Monday night for the purpose of making plans for the organization of the Branford Retail Merchants Association.

The meeting involved an open forum during which constructive suggestions for the good of Branford were voiced and numerous reasons were given as to the necessity of such an organization being formed. The attending merchants were unanimous in their approval of the formation of such an association as soon as possible. It was the opinion of the assemblage that a united effort on the part of local merchants could greatly improve shopping conditions here and be of mutual benefit to consumers and retailers.

Charles Freeman, well known local hardware merchant, acted as the temporary chairman and at the conclusion of the meeting appointed the following merchants as members of the membership committee: Fred Blicker, John Bomboliski, Lewis Hamilton, M. R. Zeigler, Stanley Tolman, Charles Freeman, Mrs. Robert J. Lancraft, Mrs. Agnes Toole Wallace, E. F. Caddy and Solly Donadio.

F. Wooding Company of Wallingford, which was the lowest bidder on both jobs. PWA headquarters announced over the week end that J. At Bradford Manor the first undertaking will be the demolition of the present fire house, which was badly gutted by a year or so ago.

Definite awards were made Friday by First Selectman James Sullivan and Architect Harold Davis.

WAR ON CRAZY WEED
 Marihuana has been feared at a distance by Connecticut residents as they watched vigorous crusades elsewhere in the country against the weed that is classed as one of the deadliest narcotics known. The menace suddenly hit home with the discovery of a large crop on Hamden land, and Connecticut has no longer afforded to be passive in its attitude toward a great destroyer of human values.
 Marihuana is a rank grower. Its seeds were sown on dumps in metropolitan New York and yielded large and valuable crops until police and federal agents got busy. It was found that the weed was being used to make "reefers" that were sold to high school children, among others. In the Far East it was known as hashish, the crusaders said, and has been and still is used in our southwest as the loco weed, which, as the name implies, drives addicts crazy.
 The drug produced its cheap, and hence all the more dangerous, traffic has been growing until it has had to receive federal attention on a large scale. Agents are combing the country at all times now to locate and burn crops.
 Authorities have abundant evidence that this drug is more addictive in its effects than others which the public is more familiar with. Users are entirely bereft of reason after their "joy smokes" and they ston, debauch and kill without realizing what they are doing. Many wild holdups and other crimes are committed while the perpetrators are under the influence of this brain-poisoning drug. There will be no doubt about Connecticut's vigilance hereafter in going after the loco weed and in swiftly punishing any who may be tempted by the large profits to traffic in marihuana.—Meriden Record.

A BUSINESS VENTURE
 The American way of doing business up to now has been to buy from the man who could give us the most for our money. We Americans are very great "shoppers."
 It has been only natural, therefore, that the man who could come up with the lowest price and still make a profit for himself and his investors should be able to step in business. Bankruptcy has avoided those who charged too high prices, or produced second-rate goods, or were such bad bargainers that they could not make a profit.
 But when Uncle Sam goes into business it's a different story. The Home Owners Loan Corporation, for instance, was set up to handle home mortgages and to save American home owners from the mortgage sharks.
 The H.O.L.C. has foreclosed on 104,613 homes. That makes the Federal government the nation's biggest real estate operator.
 Despite the foreclosures, the H.O.L.C. is losing money too. It lost eight million dollars the first seven months of this year. Does the H.O.L.C. go into bankruptcy like a private individual would? Of course not. It just gets the Treasury to borrow some more money which eventually will have to be paid off by the taxpayers, including those whose homes were foreclosed.
 The H.O.L.C. is a good illustration of what happens when the government goes into business. For not only has it failed to fulfill its function, but it has lost the taxpayers' money doing it.

ANTI-CONSUMER CAMPAIGN
 Consumer education is being spread rapidly by consumer groups and consumer courses in high schools and colleges that it has drawn the attention of the Federal Trade Commission. According to an advertising journal, a "co-ordinated" campaign to combat the anti-advertising propaganda of the so-called "consumer groups" has been announced by the Hearst interests.
 "The three purposes of the campaign are to result consumers on advertising and advertised products, to carry the story of these products to retail druggists and to make more sales for the manufacturer."
 "The Plan includes educational 750 copies on the value of nationally advertised goods to be run by AMERICAN DRUGGIST in COSMOPOLITAN every month for a year beginning in October, and editorial cooperation, month by month, by Hearst newspapers."
 "No manufacturer who honestly advertises honest goods need to fear organized consumer groups or consumer education. Even the calling of enlightened consumers who want to get the best value when buying, by the name of radical or red will not destroy the consumer movement. (There is a tendency to use this name to scare advertisers and makers of advertised products who appear to be worried over the growth of the consumer movement.)"
 "There is only one answer to advertisers and makers of advertised products who appear to be worried over the growth of the consumer movement. It is to make your products of honest materials and label them with truthful and informative statements and to send out a superior in national advertising. Then these pesky consumers who want to know the quality, grade and contents of the goods they buy will have little reason to kick."
 "Perhaps it might be better for the advertisers to get together and appoint a czar of consumers to keep them in line rather than let consumers' complaints against advertisements reach the stage where the government will feel that it will have to step in and do something about it."

COOPERATIVE HANDSTICK
 Acting on behalf of the two million members of cooperative purchasing associations in the United States, The Cooperative League of the U. S. A. has submitted to the monopoly investigating committee, authorized at the last session of Congress, a request for the opportunity to present reasons and statistics covering the effects of cooperatives in preventing monopoly.
 When open hearings are scheduled by the committee, the League proposes to submit evidence based on experience in European countries, particularly in the Scandinavian countries, where it is reported that "cooperatives tell big business what a last resort is according to Mr. Albin Johansson, president of the Cooperative Union of Sweden. The breaking of monopolies by cooperative competition, rather than dependence upon regulation by the government, in the margarine, rubber, electric lamp bulb and other fields in the Scandinavian countries, will be supplemented by statistics showing the effect in the United States of cooperatives in lowering the price of fertilizer and other commodities."
 "A Digest of the Cooperative Press" published by the International Cooperative Alliance of London, indicates that cooperative associations in other countries are also active in urging their governments to give favorable consideration to the possibilities of cooperative control of monopolies. A French cooperative publication decries the adoption of "gardamism" which they describe as the "criminal device of destroying products in order to maintain prices by capitalist enterprises," and declare that "the government should make it clear to consumers that Co-operation is the most efficient weapon at the present time for stabilizing prices and restoring the balance between production and consumption."

THE BRITISH GOVERNMENT
 The British go even further than that. The "right to strike" is technically protected by law. But many labor contracts stipulate specifically by NEGOTIATIONS TOWARD SETTLEMENT OF A DISPUTE MAY NOT BE BROKEN WHILE A STRIKE IS IN PROGRESS.
 Also, contracts for a closed shop requiring every employee to belong to a union despite his personal wishes are described by the Commission as "exceptional."
 And the check-off under which the employer deducts union dues from his pay of his employees is said to be "very exceptional."
 The whole British effort, in short, is to LET THE GOVERNMENT SERVE ALL THE PEOPLE RATHER THAN INDIVIDUALS OR GROUPS.

THE SUBMERGED EIGHT-NINTHS
 Anybody who thought Senator Pat Harrison was joking the other day when he said the federal tax screws will be tightened another turn had better think again. He was serious, and so is the problem.
 The first two months of the new fiscal year, the Federal treasury—despite the highest taxes in many a year—wound up with a deficit of \$646,648, 204. Thus we start the ninth consecutive year of letting the Federal government live above its income. That just can't go on forever.
 In 1938, all our governments—federal, state and local—will collect about \$13,500,000,000 in taxes. A lot of folks think that won't hurt them because they pay no income taxes. But the hard facts emphasize that taxes are paid in the sweat of every man who works.

NEW HOME FOR EASTERN COOPERATIVE WHOLESALE
 The Eastern Cooperative Wholesale of New York City has completed the job of moving into its new, modern home at 135 Kent Avenue, Brooklyn, N. Y. (See this column August 18, "Eastern Cooperative Wholesale Expands") His history over the past four years has included "moving days," starting from a single office room in 1934, to a four-story building with 27,500 square feet with twenty employees. In 1934 its volume was \$187,000 of which was brokerage buying for a small group of retail cooperatives and caterers. Auditors' figures for the first seven months of 1938 show a total of volume of \$393,973, of which \$285,287 consisted of warehouse shipments. Included in the stock of merchandise on hand today are over 300 cooperative labeled products. Retail cooperative accounts number over 200.
 Manager L. E. Woodcock states that the new location and facilities of the wholesale are extremely favorable and not only central but it is located directly across the street from the Eastern District Railway Terminal, which is the junction of all railroad lines in Brooklyn, and is also well located for truck transportation.
 The new location is on the margin in the east. Practically all of the cooperatives in New England and other eastern states buy their groceries through the Eastern Cooperative Wholesale.

RISKED HIS LIFE FOR COMRADES
 Heavy seas on the sandy shore of Jaina Beach, Santo Domingo, where Private John Greer and several of his Marine Corps buddies were with a swimming party, Sunday, Sept. 12, 1938. They were a part of the expeditionary force, which at that time was engaged in bringing a measure of stability to the West Indian republic.
 Under normal weather conditions in that tropical country it was customary for the Marines to take a dip in the Caribbean. Despite the heavy surf and the unusual roughness of the sea, some of the group ventured into the waves, heedless of any immediate danger.
 Greer was watching from the beach, and when two of the swimmers were some distance from the shore he noticed that they were being tossed about as if they were being blown by a strong wind. He was not a swimmer, but he was in imminent danger of drowning. Grasping a line he swam boldly

Meanderings of a Book Worm

"Camp Catering" or how to rustle grub, was a help on our trip to the mountains but the next time we go camping during a rainy fortnight I'd say I stay right here in my comfortable house.
 The trouble was not at all with "Camp Catering" but with our men folks who were determined to "camp cater" from morning until night. We never did get hungrier but I stay right here in my comfortable house.
 Now it is a different story, my good husband and our next door neighbor have taken up chess, much of which they learned from "The Art of Chess-Playing" edited by Edwin V. Valdey Mitchell and now my problem is to get Ted away from the chessmen long enough to eat Valdey's best looking collection. With similar his interests may vary but he continues to be fond of airplanes for I noticed he has Edw. R. Hamilton's "Complete Model Aircraft Manual" on his library card. Airplanes are mysterious to me but the plans and diagrams are marvelous of clarity and accuracy in Hamilton's manual.

 An invaluable, authoritative guide to the art treasures of the world Sir William Orpen presents in a single volume called, "The Outline of Art." Pat tells us the story in European Art from the 13th century to the present day.
 Three books I have asked to have at the desk for us are: "The Art of 1903 What?" by Robert Bentley; "The Coming Victory of Democracy" by Thomas Mann and "The Story of Methuselah" by René Fulop-Miller.

Touch-Down Football

This is the first of a series of six outstanding diagram plays by leading college coaches from Grantland Rice's new Cities Series Football Guide.

The Giants tied it up in the second when Olson left with a hit and Novak walked. Olson stole third and when the substitute threw wild to third, Olson scored, Novak going to third. Novak was out after Duda reached first. Olson hit Baroni off.

Higgy went into the box in the sixth when Brainerd singled, Spencer singled and Parmelee advanced them with a grounder. Bill Nosal scored Brainerd with a single and a moment later Spencer scored on a fielder's choice.

Boasting a story genuinely human in theme, richly enhanced by homely humor, with scenes laid in the contrasting backgrounds of a quaintly rustic section of Penna. and the entertaining world of Chicago, and with an elaborate and beautiful sequence has ever starred in "Breaking The Ice" which comes to the Loew Poll College for one week starting Friday, Sept. 16th. Featuring the world's youngest ice figure skater, Irene Dare, and Charles Ruggles and Dolores Costello, at the head of a supporting cast of brilliant names. "Breaking The Ice" is little Miss Dare's debut in motion pictures, and it is fortunate that she found a pic-

ture and a producer worthy of her unique talents. This child is a marvel at skating. With the least amount of efforts she somersaults, spins, and dances to the accompaniment of a full orchestra of forty pieces. "Breaking The Ice" is a distinctly different vehicle for Bobby Breen—better in story, larger in scope, superior musically, and by all odds the most entertaining film yet credited to the boy-singer.

The cast also features Robert Barbet, Charlie Murray and Dorothy Peterson. Revealing modern police methods of planting undercover men at suspected spots to get evidence of criminal activities, the story of "Night Spot" which is the 2nd big feature on the College Theatre program featuring Parkyakarkus, Allan Lane, Gordon Jones, and Jean Woodbury, deals with a musically minded policeman assigned to play in an orchestra of a night club operated by a suave gangster and his henchmen.

Lane and Woodbury are cast as the hectic lovers, while Bradley Page is seen in the role of the suave gangster. Gordon Jones as Lane's Partner, and Parkyakarkus as a nitwit gangster.
